

June 14, 2010

Dear Parent/Guardian,

The State of New Jersey strongly recommends that every asthmatic student have an Asthma Treatment Plan (*see back of this letter*) completed by the physician and on file in the nurse's office.

An Authorization to Receive Medication in School form must also be signed if the student needs to take medication in school/class trip

In accordance with state regulations, a nebulizer is available in the nurse's office. Due to obvious health concerns, we request that you provide the tubing with mouth piece and medicine chamber.

Thank you,

Annamae Curran
School Nurse
